- + And More...

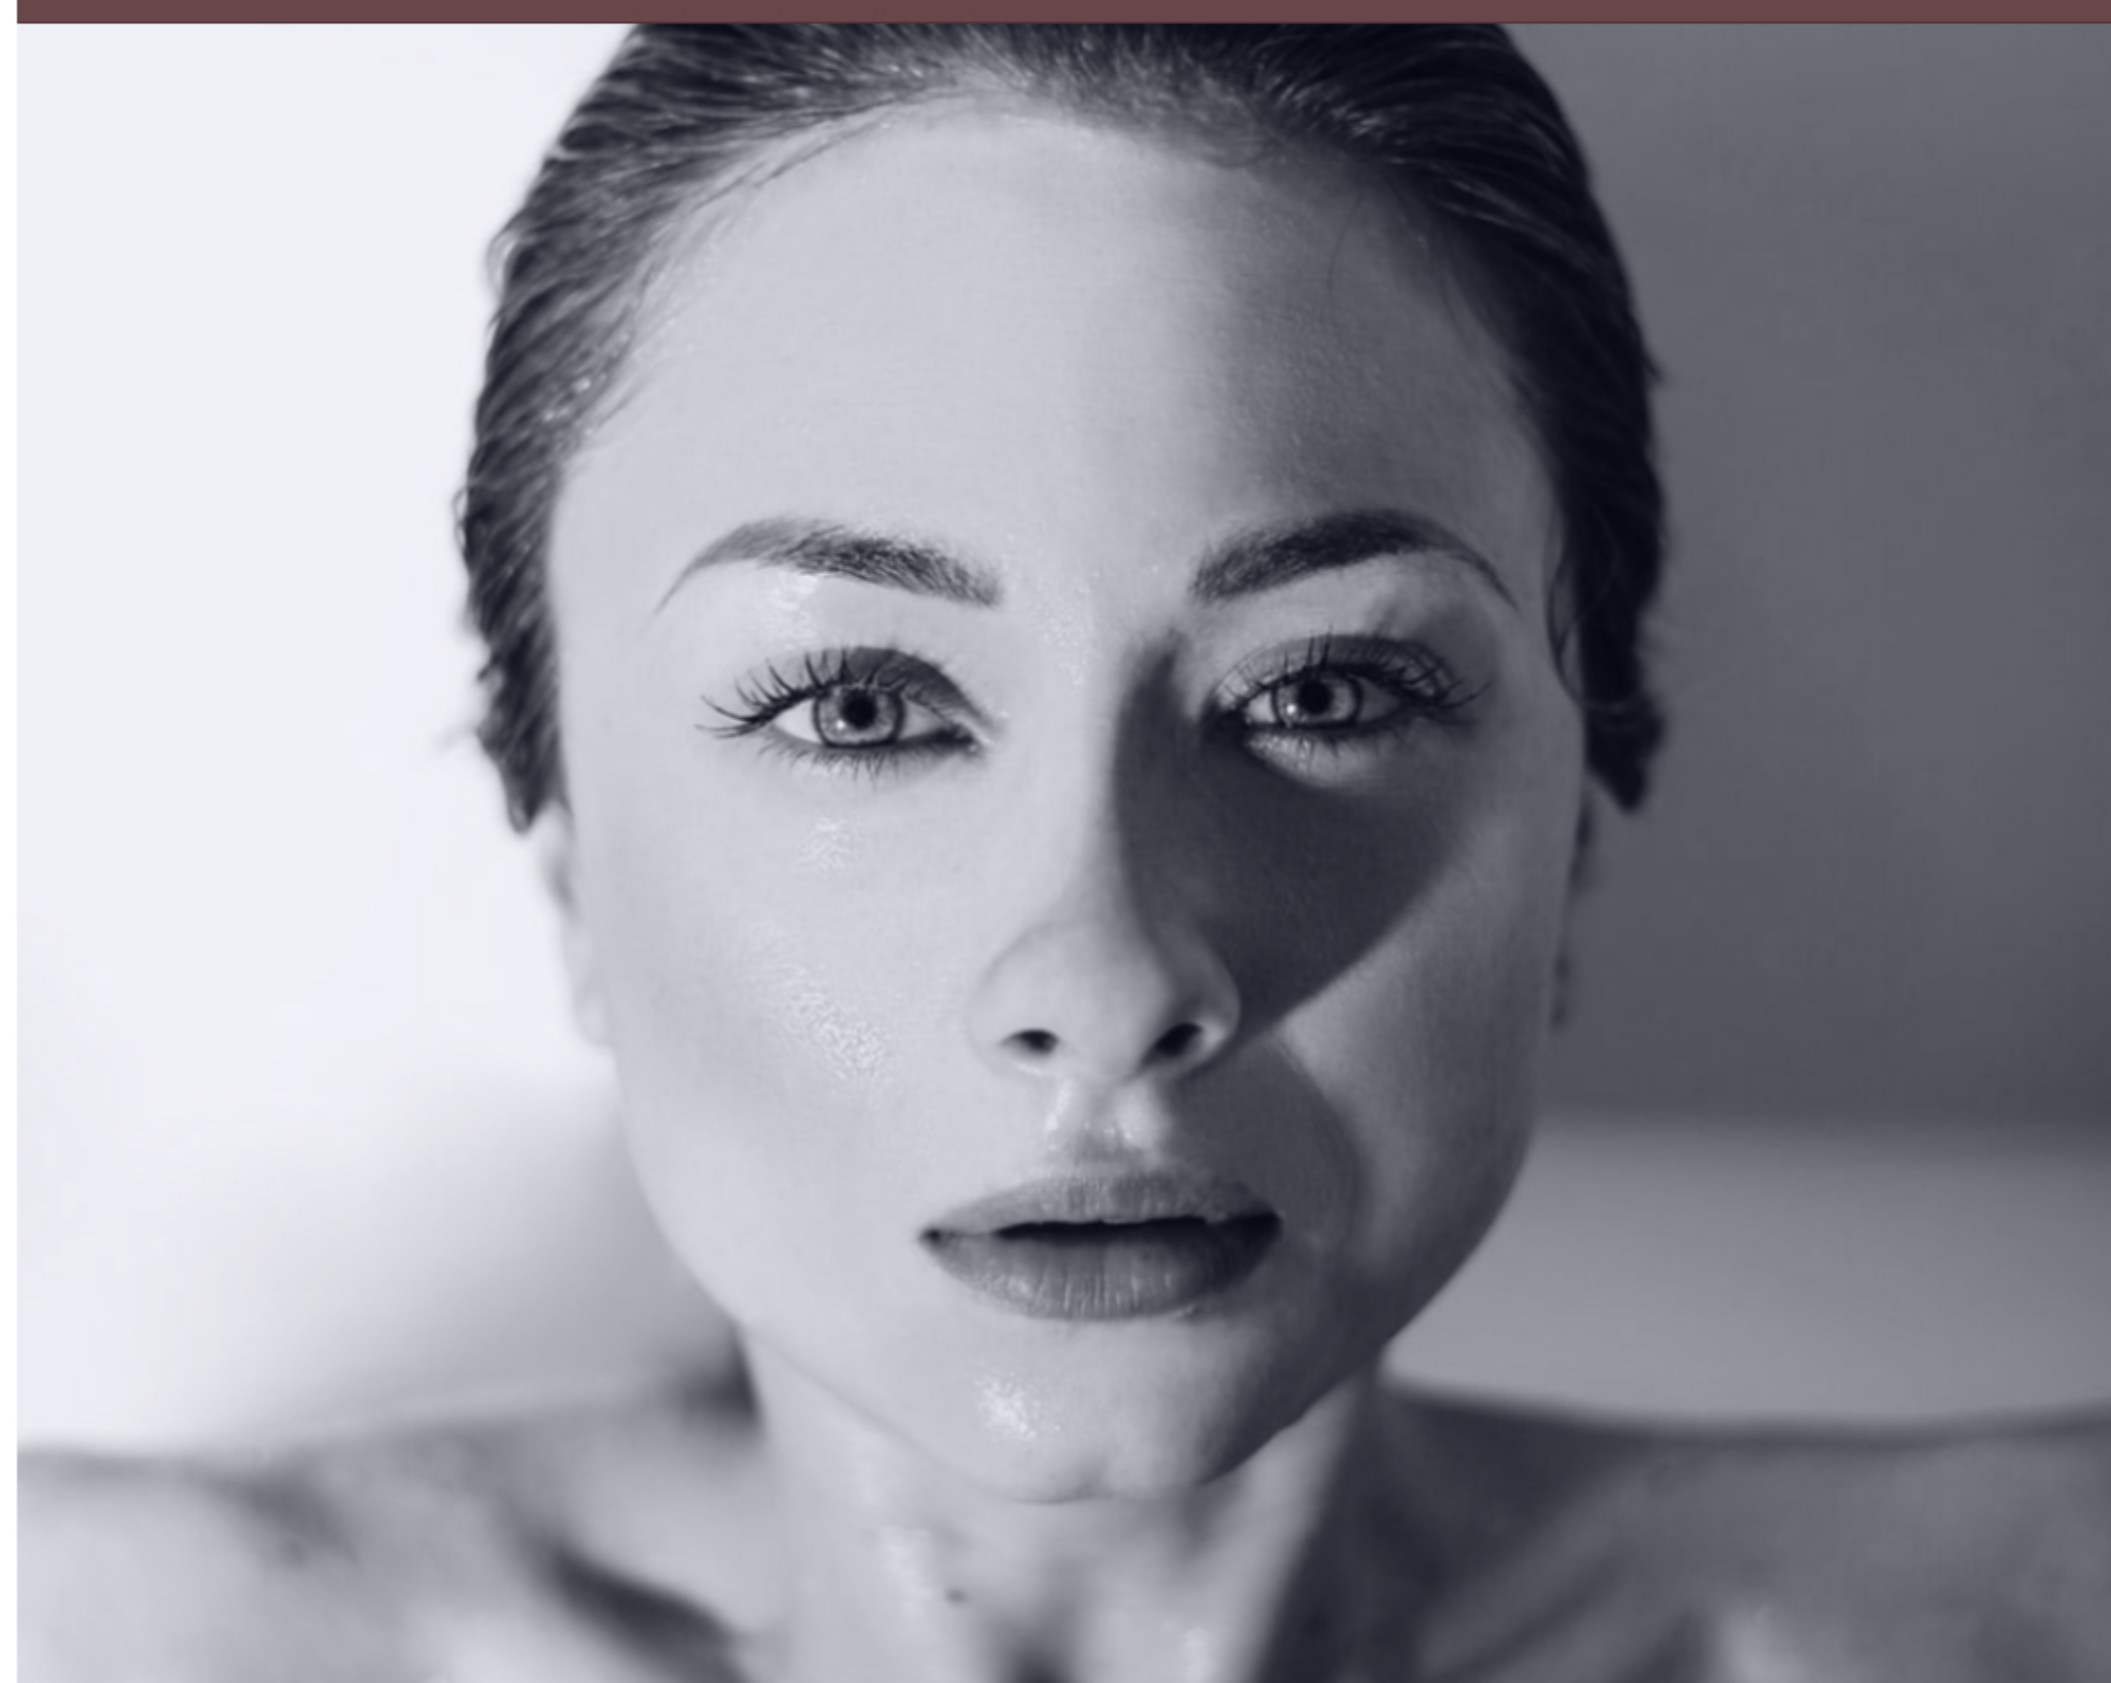

Laser hair removal is done here in the office and takes anywhere from 15-45 minutes depending on the area(s) you are having treated. The laser technology will be adjusted to the color, thickness, and location of the hair in the treatment area, as well as, the color of your skin.

### PLEASE BE ADVISED!

**For Tattoo or Hair Removal treatments, you must shave and apply the lidocaine cream (optional) to the treatment area 1 hour prior to your appointment.**

# NOW INTRODUCING... LASER TREATMENTS & PROCEDURES

## Important Information

### Scheduling Process

Once you schedule your treatment, we send two prescription creams, lidocaine and anti-scarring, to a compounding pharmacy called Well Lake. They will call you once they verify your insurance and then mail your prescriptions to the address of your choice. If, for any reason, you are not able to obtain the medications before your treatment, be sure to inform our office staff so that we may use an alternative. You must wait a minimum of 6 weeks between each treatment session to allow the treated area to heal properly.

### Care Instructions

The lidocaine cream is to be applied 1 hour prior to each treatment to help with any discomfort during the treatment. The anti-scar cream is to be used after treatments to keep the treatment area moist and help with any inflammation. If you are scheduling a hair removal treatment, avoid plucking, waxing, and/or threading during the course of your treatments. Before tattoo or hair removal treatments, you must shave the treatment area on the day of your appointment. We advise Avoid direct sun exposure at least 2 weeks before and after any laser treatment.

### Pricing

Call our office or email [sepim@manikmdpa.com](mailto:sepim@manikmdpa.com) for pricing inquiries. When requesting information via email, be sure to include your name, date of birth, and contact information.
